

#### THE INNOVATIVE COMBINATION OF FORCE AND POWER

## FATHERS AND SONS: A GUARANTEE FOR INNOVATION AND QUALITY FOR FOUR GENERATIONS.

DESCH was established in 1906 and as an owner-operated family company, it is now being run successfully by the fourth generation. Today, DESCH is an international company in advanced mechanical and plant engineering that is proud of its roots in the Sauerland region of Germany. As a market-leading drive technology partner, we provide innovative, customized, complete solutions along the entire drive train. Our name stands for the highest quality and top of the line service – we look forward to developing new solutions to meet your challenges.

Heinrich Desch, Senior

## CUSTOMIZED, COMPLETE SOLUTIONS FOR MANY INDUSTRIES.

We design and produce drive solutions and provide complete solutions for just about every industry. Moreover, we develop future-oriented technologies such as drives for tidal power plants, which transform ocean currents into energy. We know our customers' markets, in which customized and flexible solutions are becoming more and more important. The cutting-edge technology of our precision drives and our expertise in consultation and service are valued all over the world.

IDEAS, DESIGN, PRODUCTION, SERVICE: EVERYTHING FROM A SINGLE SOURCE.

From the idea to design and production, on to assembly and followed by service – with us, you get everything from a single source. For us, intensive discussion with our customers forms the foundation for the further development of our products and services. We get started while others are still thinking about it.

For advanced mechanical and plant engineering, we develop and produce planetary and special gearboxes, press drives, and innovative clutch technologies and we keep an extensive range of product series of standard drive elements in stock.

#### OUR INTERNAL DRIVE: ALWAYS PRODUCE THE BEST.

To be successful on the global market, we're expanding our technical advantage with continuous innovation. We kept this aspiration in mind with our new development center, which is one-of-a-kind in its class. The test stands are located on vibration-free foundations in climate-controlled rooms. We designed and built all of the test stands ourselves. Each of our safety clutches and each of our gears are tested here.

The test stand for complete press drives and the clutch grinding test stand are the largest of their kind in the world and include unique, computer-monitored testing technology. We invest heavily in machines, service and the initial and advanced training of our employees in order to offer you steadily increasing benefits. Our "high class" production implements innovative ideas at the highest level of quality.

### MORE THAN THE SUM OF THE PARTS. WE SUPPLY THE OPTIMUM COMBINATION.

We enjoy recognition worldwide as a leader in expertise with regard to our customized solutions. Moreover, we keep an extensive range of product series of drive elements and innovative coupling technology in stock. No matter if you need a building block solution or a specialized one – we realize an innovative product through combination and synchronization. Think smart – SyncDESCH.

With a wide-ranging product spectrum and our service offers, we cover the requirements of drive technology at the interface between the drive machinery and the processing machinery: from belt drive to shaft bearing and rigid or flexible connections, on to couplings and brakes with proven clutch or braking systems and even power boosting with highly developed gearbox technologies – we offer you the optimum solution.

Complete drive for presses

Servo press drive Servox® DS

Spindle gearbox Denox® HS

Azimut gearbox

Rotary table drive Denox® DT with motor

Revox® crusher drive

Planox® transmission

Belt drive with Planox® clutch

# WE PUT OUR PLANET INTO MOTION. WORLDWIDE — AND ALWAYS CLOSE TO WHERE YOU ARE.

Our teams are working all over the world to be close to you. The DESCH group of companies is known for its ambitious and open company culture, which enables our employees to develop their capabilities, talents and potential to the maximum and to use them to reach our company goals and on behalf of you, our customers.

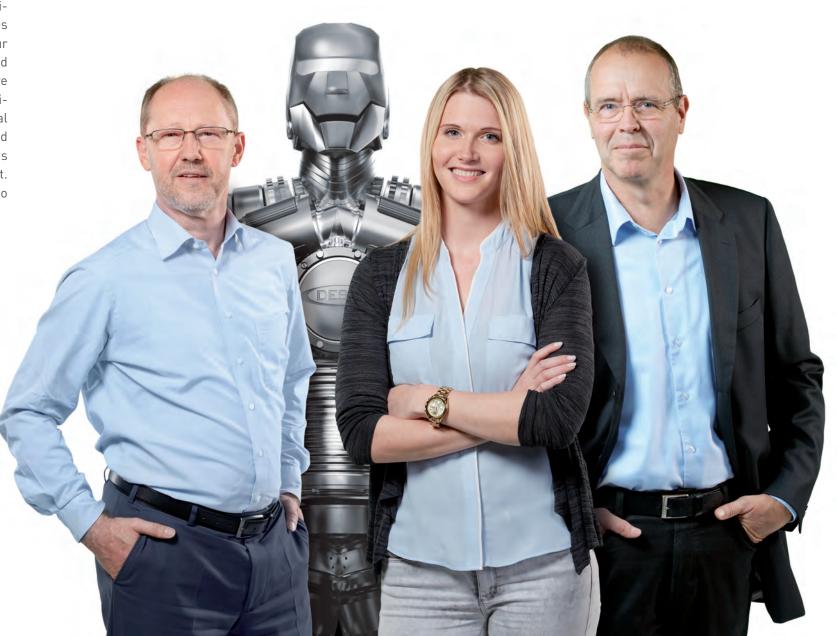

14 I 15

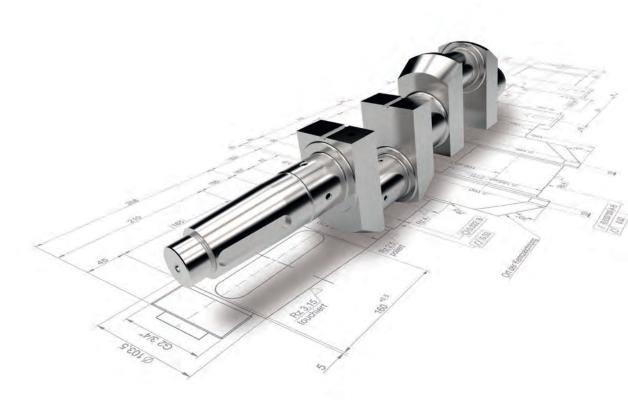

### SINCE 1906, THE MOST IMPORTANT PART OF OUR COMPANY: OUR EMPLOYEES.

Sustainable success is achieved with excellent teams. Since the establishment of our company, qualified, motivated and high-performing employees have been the key to our success. Our employees, often in the second and third generations of families who have worked for us, have innovative capabilities, a wealth of ideas and professional qualifications that are demonstrated in many patents and utility models as well as in our system for improvement. Our employees are looking forward to a successful cooperation with you.
