

DESCH - SERVICE WITH SYSTEM

We will do the job for you!

THE SYSTEM FOR YOUR MAINTENANCE!

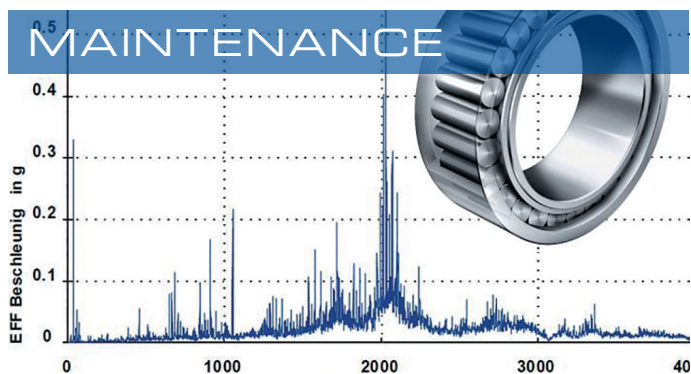

Today's demands on machines and systems confront companies with increasingly complex tasks. Due to higher productivity and capacity utilization, the mechanical components are heavily challenged. Service life and maintenance intervals are maximally exhausted.

Preventive maintenance is more important than ever and today's industry cannot be imagined without it. Unplanned machine downtimes and breakdowns cause very high secondary costs and should be avoided under all circumstances. Long-term planning and early coordination of preventive maintenance saves money and maximizes machine and plant availability.

The possibilities of industry 4.0 provide support by using digital media, tools and key figures for the condition-oriented monitoring of production plants against sudden failures. In order to develop a specific and optimized concept for your company, maintenance professionals depend on reliable and competent partners.

The Business Unit - Service & Customer Support of the DESCH Group offers its customers different possibilities to meet all requirements of today's maintenance. We are happy to provide our experience and know-how by offering the following service kits.

To ensure your productivity in advance!

After individual consultation and at defined intervals, we carry out inspections, oil changes and the replacement of bearings and seals or other wear parts on your drive solution for you. We are also happy to handle inspection work for drives from other manufacturers.

To recognize first signs early to safeguard your productivity!

Together with you we develop specific parameters and offer on-line and offline vibration measurement technology, wear measurement and condition monitoring. DESCH Control.M becomes your interface to industry 4.0.

BUSINESS UNIT - SERVICE & CUSTOMER SUPPORT

To fully support our customers at any time!

You will find production facilities in Germany, Canada, China and Brazil, as well as sales partners around the globe. We support you at the location of your plant or machine with highly skilled/experienced personnel for the success of your production - „WORLDWIDE“!

A first-class team of engineers and technicians will support you in your projects!
